

Project Statement

1)The project statment is to create a Offline framework.

The project has 2 parts

- 1) HTML5 Front End
- 2) Javascript framework

The framework will be custom made by the company. It will make use of templating engine.

The framework will be compatible with all major browsers.

The framework will be based on javascript and prototypal inheritance model.

Prerequisites:

you will need to go through the following tutorial to get started with the project.
